PROFILE

Computer Science student and aspiring software developer with an interest in web application development, user interface design, and software projects. Experienced in developing academic and personal projects, including an Online Hospital Management System, and interested in building practical, user-friendly digital solutions.

TECHNICAL SKILLS

Programming: [Add your programming languages]
Web Development: [Add your web technologies]
Database: [Add your database technologies]
Tools: Git, GitHub, VS Code, Figma

PROJECTS

Online Hospital Management System

Academic web application designed to support hospital operations and interactions between patients, doctors, hospital administrators, and IT/system administrators. The project includes interface planning through low- and high-fidelity designs and focuses on organized access to hospital-related services and information.

Role: Student Developer **Technologies:** [Add technologies used]

Personal Portfolio Website

Responsive personal portfolio website presenting profile information, skills, projects, education, contact information, and a downloadable CV.

Role: Developer **Technologies:** HTML, CSS, JavaScript

EDUCATION

[University Name]
Bachelor's Degree in Computer Science / [Exact Degree & Department]
Current status: [Year / Semester]

ADDITIONAL INFORMATION

- Interested in software development and modern web technologies.
- Interested in UI/UX design and converting interface concepts into functional web applications.
- Familiar with Git/GitHub-based development workflows.

Note: Replace the bracketed fields with your actual contact, education, skills, and profile links before submitting this CV.
